MATH 1575 (PLTL)
Calculus II

Instructor: Hans Schoutens
Office hours: Tues/Thur 5:45-6:45PM, Namm 826
Webpage: bit.ly/schoutens
Email: HSchoutens@CityTech.Cuny.Edu

MIDTERM EXAMS (60% of grade):
There will be 3 tests during the course (dates TBA). The best two scores will each count for 25%; the lowest score will count for 10%. Exams start at the beginning of the period. No extra time is given for students who arrive late, and there will be no make-up exams. If you have a valid reason for not being able to take the exam, you can drop it, provided you contact me as soon as possible to notify me of this, and you can produce a doctor's note or a note from the dean justifying your absence.

FINAL EXAM (30% of grade):
A full period final examination is given the last class meeting of the semester. It covers all topics studied. It must be taken to pass the course.

WORKSHOP (10% of grade):
This course has an additional, mandatory 1 hr workshop on Thursday, right after the lecture. During this workshop, you will be working on some homework problems form the previous session and the new homework, with aid of your peer-leaders. At the end of each workshop, you will get 5/5 points if you completed all the work, and proportionally less points, if you only did partial work. You are allowed one absence, but any additional absences will result in a lower grade. While this is a good place to work on homework, you will only be able to do part of the assigned homework, so it is important that you make the remaining homework at home.

ATTENDANCE
Attendance is mandatory. Absence, latenesses and students leaving before the end of the period will be recorded. When these exceed the 10% margin allowed by the College, they will result in a grade reduction, and in excessive cases, in a request to withdraw from the course.

HELP
For help with the course, come to my office hours (see above) or go to the Liberal Arts Learning Center AG18. If you are stuck with a homework, it might also be useful to consult first one of your classmates. However, you are not allowed to copy your homework solutions! Do not wait until the night before the exam to get help! If there is something you do not understand, get help immediately!

TEXT BOOK
We will use a free online textbook, APEX Calculus, Version 3.0
APEX Calculus, Version 3.0, in b&w (go to their webpage for the colored version)

CALCULATORS
For this course, you are required to have a graphing calculator. Each time, bring you calculator with you to class and on the exams.
