Blackboard courses always appear on an instructor’s Home page, however, they do not appear on the student's Home page until they are made available to the students. Steps to make a course available:

1. From the Blackboard Home page, click on the course under My Courses list.

2. Under Control Panel, click on Customization then select Properties.

3. Scroll down to Set Availability section and click Yes radio button (option). Make sure to click Submit button.

Please email us at itec@citytech.cuny.edu or call us at (718) 254-8565 if you have any question.
